

# SPOTTED GUM: A GREAT CHOICE

Spotted Gum is an Australian hardwood, known for its colour, strength and durability. It is classified as a Class 1 durable above ground i.e. 40 years (AS5604, 2005)

It's intriguing name hails from the way it sheds its bark. Unlike other trees that shed in strips and patches, the Spotted Gum sheds its bark in elliptical strips leaving a soft mottled colour and a spotted pattern on the tree, causing it to be a stand out in any forest.

**BORAL TIMBER**  
Build something great™

Preoiled Spotted Gum

Scientific Name

Corymbia Maculata

Applications

- Decks
- Screens
- Fences
- Seating

Grades

Standard and Better

Board lengths

1200mm - 5700mm

Standard sizing

90 x 22mm

134 x 22mm

Species

Spotted Gum

## Simple yet unique, a wonder of nature.

The Spotted Gum is an appreciable timber to work as it has a good level of natural oils which allows good machining. It accepts oil and stains well and has a lower tannin content than most of the eucalyptus species.

It can be used for house framing, retaining walls, decking, fencing, flooring, furniture, bridges, wharves, poles and piles.

Walnut Stained Spotted Gum

Timber supplied, factory oiled with a single coat of Feast Watson traditional timber oil.

## Features

- NEW robust 22mm profile
- Boral Decking is available in many other durable Australian hardwood species including Spotted Gum.
- Unlike many other imported products, Boral decking has an Australian quality assurance system that ensures strict tolerances and drying procedures to produce a high quality product.
- Boral Timber decking is Responsible Wood Chain of Custody certified providing peace of mind that Boral's decking is sourced from sustainably managed and legal forestry.
- Spotted Gum can be used for internal flooring and decking, which is aesthetical and creates good transition from interior spaces to the outdoors.
- Spotted Gum is naturally fire resistant (BAL29) and so it is suitable for use in bushfire prone areas.
- Installation should be in line with the NZ Building Codes. Please refer to installation manual provided by Timspec Timber Specialists.

Note: Variations of colour within a timber species are normal, therefore photographs, samples and displays can only be indicative of the colour range of the timber species nominated. Timber is a natural product and commonly reacts to changes in atmospheric and environmental conditions such as humidity and temperature. This is considered normal.
